Journal of Corpus Approaches to Chinese Social Science (JCACSS)

The [Journal of Corpus Approaches to Chinese Social Science](https://doi.org/10.24103/jcacss) (JCACSS, ISSN 2633-9617 Print, ISSN 2633-9625 Online, DOI: <https://doi.org/10.24103/jcacss>) is inviting submissions for its upcoming volumes 7 and 8 in 2025 and 2026. JCACSS is dedicated to advancing the application of corpus methodologies in the field of Chinese social sciences. By integrating innovative corpus methods with traditional quantitative and qualitative analyses, the journal aims to explore and expand the frontiers of social scientific studies in the era of big data. We are particularly interested in research that navigates the complexities of analyzing massive electronic text corpora to address pressing social issues.

Scope and Interests:

- Innovative corpus approaches to Chinese social sciences
- Integration of corpus methods with quantitative and qualitative analyses
- Big data analytics in social scientific research
- Case studies that utilize electronic text corpora to address social problems

Why Submit to JCACSS?

- Cutting-edge Research: JCACSS publishes high-quality research that addresses the challenges and opportunities presented by the era of big data in the social sciences.
- Academic Exchange: The journal serves as a vibrant platform for scholars with shared interests to exchange ideas, methodologies, and findings.
- Global Digital Era Concerns: Contributions that respond to the sociolinguistic challenges posed by global digitalization are especially welcome.

Submission Guidelines:

- Manuscripts should align with the journal's focus on applying corpus methods to Chinese social sciences.
- Submissions must be original work and adhere to the highest academic standards.
- For submission details, including format and length, please visit our submission portal.

We welcome your contributions to this evolving field and look forward to publishing research that will enrich our understanding of Chinese social sciences through the lens of corpus methodologies. For more information and to submit your paper, please visit [our website](#).

Join us in shaping the future of Chinese social science research in the digital age.
